NEWS RELEASE

CapitaLand's next-gen integrated developments CapitaSpring, Funan and Jewel Changi Airport win top BCA Universal Design Mark Awards
Somerset Ho Chi Minh City becomes highest BCA-rated property in Vietnam

Singapore, 22 May 2018 – CapitaLand's next generation of iconic integrated developments in Singapore - CapitaSpring, Funan and Jewel Changi Airport¹ - won Building and Construction Authority's (BCA) Universal Design (UD) Mark Design Gold^{PLUS} award, the highest accolade for UD for projects under development. Funan also achieved BCA's Green Mark (GM) Gold^{PLUS} award this year. When completed, the properties will not only redefine Singapore's architectural landscape, by incorporating sustainable and inclusive design elements, they will enhance liveability and redefine the paradigms of live, work and play in Singapore's Central Business District (CBD), the Civic & Cultural District and aviation hub respectively.

CapitaLand continues to be the top real estate developer in Singapore with the most UD Platinum and UD Gold^{PLUS} awards, winning 17 of these awards since the UD Mark Certification scheme was introduced in 2012.

Mr Tan Seng Chai, CapitaLand's Group Chief People Officer and Chairman of the CapitaLand Sustainability Steering Committee said: "As a responsible developer, CapitaLand recognises how the built environment can influence community development positively. These next-gen iconic developments are a testament to CapitaLand's extensive real estate design, development and master planning capabilities. From introducing thoughtful designs that are creative and inclusive for every sector of the community, to creating unique features befitting of these highly anticipated landmark projects that are close to the people's hearts, CapitaLand has once again shown its strong commitment to achieving at least UD Mark Gold for all its new developments in Singapore."

Highest BCA-rated property in Vietnam

Somerset Ho Chi Minh City in Vietnam achieved the GM Gold^{PLUS} award, making it the highest BCA-rated property in Vietnam and in CapitaLand's portfolio in Vietnam. The serviced residence was fitted with water efficient fixtures as well as efficient air-conditioning systems and LED lightings to reduce the building's carbon footprint. The serviced residence also encourages its residents to live sustainably. Friendly reminders to switch off lights, save water, and reduce the use of single-use plastic can be found within the apartment. Somerset Ho Chi Minh City has set up a green corner to promote recycling. The serviced residence also organises events such as tree-planting and environment-themed movie screenings to further inculcate green habits amongst the residents.

"Our achievements in greening our global portfolio affirms our commitment. More than 90% of CapitaLand's existing properties in Singapore have received at least a Green Mark Gold rating

¹ Jointly developed by Changi Airport Group and CapitaLand.

and we are pledging to green our existing properties globally by 2030. We will continue to combine smart sustainable designs with active placemaking initiatives to engage our customers, stakeholders and staff to play an active role in safeguarding our environment,” added Mr Tan.

Mr Hugh Lim, BCA’s Chief Executive Officer said: “CapitaLand’s achievements in the BCA Awards 2018 exemplifies their emphasis on people-centric designs to create communities and promote inclusivity as well as championing environmental sustainability. This also underscores the important role that developers play in leading their project teams to adopt a user-centric philosophy right from the start and to ensure that the design intent is implemented. In this year of Climate Action, the BCA Green Mark Pearl Award for Capital Tower is also a testament of CapitaLand’s environmental stewardship to work with their tenants and end-users in rolling out various green practices within their organisations. Their achievements are indeed commendable and I hope they will continue to inspire more tenants and end-users to follow suit.”

Highlights of UD features at CapitaSpring, Funan and Jewel Changi Airport

CapitaSpring is set to inject more greenery and shared community spaces, rejuvenating Singapore’s CBD. The development’s *Green Oasis*, a four-storey high botanical promenade will become the central social space for placemaking. The development’s *City Room* lobby will blend seamlessly into the future 12,500-square-foot (sq ft) public park on Market Street. The well-loved Market Street Food Centre that will return to offer local gastronomical favourites will provide family-friendly tables and seats. Facial recognition technology to be used at the office entrance gantry will further enhance accessibility.

Located in the heart of Singapore’s Civic and Cultural District, Funan will feature a porous streetspace with multiple access points and gentle slopes. Bicycles, wheelchairs and other personal mobility vehicles can enter the building easily, supporting the country’s move towards an inclusive and car-lite society. Funan is set to become Singapore’s first commercial building to allow cycling through the building. In line with Funan’s experiential focus, accessibility and inclusivity are key. All facilities are accessible to wheelchair and pram users, including Funan’s futsal court and green urban agriculture space spanning a combined total of 16,000 sq ft. Any change in level is mediated using gentle gradients. Voice-activated interactive directories are located at escalators and lift lobbies of every level. Near-field Communication (NFC) technology will also allow transfer of directions from directory to personal smart phones. All levels are accessible via a handicap accessible lift. Accessible parking lots and family parking lots are close to the lift lobbies for easy access for users.

Jewel Changi Airport (Jewel) is designed with plenty of inclusive spaces for both travellers and local residents of all ages. Jewel’s majestic five-storey high *Forest Valley* comes with ‘active’ spaces such as walking trails to encourage active living. *Canopy Park*, located on the topmost floor of Jewel, will also offer plenty of large gathering spaces to promote social interaction amongst the groups of visitors at the complex. Jewel is seamlessly connected to Terminal 1’s Arrival Hall, and linked to Terminals 2 and 3 via pedestrian bridges fitted with travellators that allow travellers to walk to the complex.

To facilitate navigation, the three integrated developments will feature wider paths for wheelchairs and mobility aids, handicap accessible lifts, signages and handrails with Braille, and are also guide dog friendly. Family-friendly elements for the young and aged such as nursing rooms, diaper changing stations, child-friendly seats, and slip resistant grab bars provide a more inclusive experience for the community to live, work and play.

Driving sustainability through active placemaking and stakeholder engagement

CapitaLand received its first Green Mark Pearl Award for Capital Tower in Singapore, recognising the Group's environmental stewardship in working closely with its tenants to achieve greater sustainability. Over 50% of the 52-storey Grade A office development's net lettable area, including spaces occupied by CapitaLand and tenants - GIC, IINO Shipping, Simmons & Simmons - have successfully attained BCA GM Office Interior awards.

CapitaLand regularly engages its office tenants through a series of green activities such as the eWaste collection and recycling programme. It has also developed a green fit-out guide to encourage office tenants to implement environmentally friendly features and sustainable practices. The CapitaLand Commercial Trust (CCT) Eco Race also further engages the tenants in Singapore's CBD, promoting sustainability and healthy lifestyles. In the latest edition of the race, there were 380 participants from 32 tenants across CCT's office buildings.

CapitaLand received a total of 22 accolades at the BCA Awards. Please refer to the **Annex A** for more details on the environmentally friendly and inclusive design features at CapitaSpring, Funan and Jewel. For the full list of CapitaLand's properties recognised with BCA awards this year, please refer to **Annex B**.

About CapitaLand Limited (www.capitaland.com)

CapitaLand is one of Asia's largest real estate companies. Headquartered and listed in Singapore, it is an owner and manager of a global portfolio worth S\$91 billion as at 31 March 2018, comprising integrated developments, shopping malls, serviced residences, offices, homes, real estate investment trusts (REITs) and funds. Present across more than 150 cities in over 30 countries, the Group focuses on Singapore and China as core markets, while it continues to expand in markets such as Vietnam and Indonesia.

CapitaLand's competitive advantage is its significant asset base and extensive market network. Coupled with extensive design, development and operational capabilities, the Group develops and manages high-quality real estate products and services. It also has one of the largest investment management businesses in Asia and a stable of five REITs listed in Singapore and Malaysia – CapitaLand Mall Trust, CapitaLand Commercial Trust, Ascott Residence Trust, CapitaLand Retail China Trust and CapitaLand Malaysia Mall Trust.

Annex A – Universal Design (UD) and Green Mark (GM) design features of CapitaSpring, Funan and Jewel Changi Airport

CapitaSpring

Universal Design Mark Design Gold^{PLUS}

Slated for completion in 2021, the 280-metre CapitaSpring will be one of the tallest and greenest buildings in the heart of Singapore's CBD. The 51-storey vertically integrated community comprises 635,000 sq ft of Grade A office space, a 299-unit Citadines serviced residence to be managed by The Ascott Limited and ancillary retail space. The popular Market Street Food Centre will also return, occupying two floors in the development, and will offer family-friendly tables and seats.

The building's namesake draws from the development's *Green Oasis*, a city-defining sustainable design feature at a breathtaking 100 metres above ground. It will become the central social space for placemaking and community activities. Occupants can also look forward to a café, treetop cocoons, sky hammocks, and flexible spaces for meetings, social activities and rest, all connected via a spiral stairway and ramps. The development will also feature Singapore's highest urban farm.

In line with the government's efforts to transform Raffles Place into a vibrant green zone with more public spaces, wider walking and cycling paths, enhancements that will be made to the streetscape include the partial conversion of Market Street into a 12,500-sq-ft public park. Providing a spacious green expanse for leisure activities, the park will blend into the *City Room* at the ground floor of the integrated development, offering activity pockets that can be used for community events. Complementing the government's strategy for a car-lite Singapore, CapitaSpring will incorporate a cycling path in its perimeter, 165 bicycle lots and end-of-trip facilities for users. CapitaSpring will also offer sheltered access to three train lines via Raffles Place MRT interchange and Telok Ayer MRT station.

CapitaSpring will feature clear directional signages, Braille signages as well as handrails with Braille indicators. It will be guide dog friendly and facial recognition technology will be used at the office entrance gantry to facilitate easy access. Family-friendly amenities such as nursing and family rooms, diaper changing station, restrooms with child-friendly seat and wash basin, elder-friendly restrooms with grab bars, family rooms at the food centre and more will be available in the building. The gymnasium in the serviced residence at CapitaSpring will also feature wheelchair friendly exercise equipment.

Funan

Universal Design Mark Design Gold^{PLUS} award and Green Mark Gold^{PLUS}

Scheduled for completion in 2019, Funan is located in the heart of Singapore's Civic & Cultural District. An integrated development, Funan comprises a six-storey retail component, a premium Grade A office and a coliving serviced residence, lyf Funan Singapore.

Featuring a porous streetspace with multiple access points and gentle slopes, bicycles, wheelchairs and other personal mobility vehicles can enter the building easily, supporting the country's move towards an inclusive and car-lite society. Funan is set to become Singapore's first commercial building to allow cycling through the building. Funan will also offer fast charging electric vehicle stations and a direct connection to City Hall MRT station.

In line with Funan's experiential focus, accessibility and inclusivity are key. Throughout the property, any change in level is mediated using gentle gradients. All facilities are accessible to wheelchair and pram users, including the development's futsal court and urban greenery. Funan will boast the largest area for urban agriculture in the city with a 12,000-sq-ft food garden and a 4,000-sq-ft urban farm, where the public can learn more about the origins of their food and 'adopt a plot' to grow their own produce. Rainwater will be harvested at the urban farm. The swimming pool at lyf Funan Singapore will feature steps and a transfer platform with handrail for handicap users.

Redefining the future of retail, Funan's infrastructure is enabled by the latest technology, which will transform the shopping experience. Voice-activated interactive directories are located at escalators and lift lobbies of every level to facilitate wayfinding. NFC technology will also allow transfer of directions from directory to personal smart phones. The property will be guide dog friendly and all levels of the development are accessible via a handicap accessible lift. Accessible parking lots and family parking lots are located close to the lift lobbies to ease access for users. There will be Braille indicators on staircase handrails and child-height handrails at the retail area.

For families, there will be designated family restrooms fitted with adult and child-friendly sanitary facilities such as wash basins and toilets for children, as well as nursing rooms with diaper changing station etc. The office blocks will feature a naturally ventilated staircase which links all office levels, thereby encouraging an active lifestyle at the workplace and less reliance on elevators.

Jewel Changi Airport

Universal Design Mark Design Gold^{PLUS}

At Jewel Changi Airport (Jewel), community engagement and social interaction are at its core. Slated to open in 2019, the development fully embraces Universal Design, providing friendly and inclusive spaces for different needs and age groups. Each space is designed to achieve the highest levels of user-friendliness, convenience and accessibility, upholding the legacy of the world's most awarded airport.

Jewel's majestic five-storey high *Forest Valley* comes with 'active' spaces such as walking trails to encourage active living. *Canopy Park*, located on the topmost floor of Jewel, will also have plenty of large gathering spaces to promote social interaction amongst the groups of visitors at the complex.

Jewel is seamlessly connected to Terminal 1's Arrival Hall, and linked to Terminals 2 and 3 via pedestrian bridges fitted with travellators that allow travellers to walk to the complex. Every level in Jewel is easily accessible via lifts and escalators, and there is also provision for handicapped access at every level, providing all visitors with equal access to Jewel's lifestyle offerings.

Nursing and family rooms are located at all levels from Basement 2 to Level 5 in Jewel. There is also a designated children's toilet at the family-oriented activity zone at *Canopy Park*.
